SENATOR VAN WYCK S BILL

UNITED STATES SENATORS TO BE ELECTED BY THE PEOPLE.

A Resolution Offered in the Senate for an Amendment to the Constitution to That Effect Be Snimitted to the People-The Vote on the Pension Veto-National.

Washington, Feb. 26.-Mr. Van Wyek to-day in speaking to the resolution offered by him yesterday, which reads: "Rosolved. as the judgment of the senate, that an amendment to the constitution proving for the election directly by the voters for United States senators should be submitted to the people for their action," said:

Early in the session I introduced and had referred to the proper committee a bill providing mi amendment to the constitution that United States senators should be elected by the people. As want of time or Inclination on the part of the committee prevented nction, I have asked the adoption of the resolution. As some of the errors and mistakes of the framers of the constitution have been corrected, so the people are demanding this must be. And while the equality of the states is preserved by an equal number from each, the states will be more fltly represented and the rights of the people recognized by nmending the constitution so they shall be elected directly by them.

"Gouverneur Morris in 1787 said: 'The senate was wanted to keep down the turbu-lence of Democracy.\(^1\) It has succeeded nt times in keeping down the turbulence of the people in their demnnds for redress of grievnnces and exemption from unjust and oppressive taxation. Now the people are demanding, and experience has demonstrated that it is not only safe but growing every yenr more necessary, they should directly elect those who represent the state, as the state is emphatically the people. The control of the legislatures by blandishments, promises of money, has been reduced to a system to that extent that one of the most successful of the monipulators of that machiaery has boldly proclaimed that it is anich easier and cheaper to purchase venal legislators than electors at the polls. The necessity for this change has been strikingly manifest within the last month, in the states of New Jersey, Indiana and Nebraska.

"In the first two every scheme and subterfuge has been used to obtain an advantage fuge has been used to obtain an advantage fuge has been used to obtain an advantage fuge to visit him who had almost abandondoned all hope of reilef, and in nearly every instance the sufferers were either eured or greatly benefitted from the treatment they received. His scientific method of disguosing disease without asking the patient a single question is a surprise to them all, but very easily understood by the doctor, as he has made the human system a study for the past sixteen years, and his large experience in the hospitals of Europe and this country has enabled film to perform many wooderful cures which have been pronounced menrable.

DR. WESLEY makes a specialty in the freatment of chronic diseases, such as Dyspepsia, Rhenmailsan, Neuralgia, Panalysis, ilropsy and all the diseases of the Bleed, Heart, Liver, Kidueys, Spine, Piles, Festales, indigenent of the people of a great state. Then judgment of the people of a great state. Then the milroad corporations interpose to reverse that judgment, and beat the people by their and in fact nearly all the diseases to which influence and wealth; by their mysterions the human flesh is helr to are treated success-agencies, so potent, actually controlled rep-Tally hy him.

The ladies that are suffering with diseases peculiar to their sex can consult the Doctor structions, on the pretext, too tidn to cover publican state a Republican, United States senator should not be elected, except by Republican votes.

"Thus when the votes of those instructed and pledged would seeme what the project is positive and speedy in its action, peuetrating the air passages, conveying the germ of the compound directly to the seat of the trouble, cradicaling impurities, removing all people had demanded. There is a serious people had demanded. There is a serious erisis approaching, when the people, the toilers, without the form of party, will be arrnyed at the ballot-box against their oppressors. The infliction of injustice and wrong are of greater injury to the republic than giant powder or dynamite. When capital, in dellance of the constitution and laws, can dearand payment of debts in gold coin only; when the upheavnl of labor can be repressed by indictments and fine or imprisonment for a conspiracy; when throughout the northwest the virgia soil is being exhausted to raise grain, make pork and leef, the producer receiving barely the cost of production, and when the products reach the sen-board so encumbered with railroad and our former boast, is often denied the laborer; when the tenant class is yearly increasing; whon three-fourths of all the farms in the republic are mortgaged; when the additions of wealth are largely to those who count possessions by thousands and millions, and labor must return thanks for the privilege to toil for reward which barely provides board and clothing. The Democracy carried slavery und fell, although in falling it did not entirely perish. The Republican party has carried monster corporations equally as mirelenting and exacting, and are reeling, stambling, falling with the terrible load. And the bumble warner waving the signal flag of danger is run down and crushed as an enemy

in the path of bloated, unreleating and unreasoning power, "And now, reckless, nervous leaders tell us there is a crisis as they madly beat the waves threat-aing to submergo the last feeble, frail resting place, and in their hisane and idiotle folly tell about straight, reliable partisans elected in defiance of the express demands of the people to savo what is left in the upper branch of congress. Year by year the party becomes weaker, even here. The desperate reniedy is prescribed that the influences and wealth and tools of hugo corporations shall be invoked to overthrow the people and secure a temporary victory, while the leaders appear as unconcerned as to the real enuse of danger and safety as Nero when he fiddled at the destruction of Rome. During this time winning power is departing from the senate, and in their wild delirinm to save, they contribute to the certainty of defeat. And thus it becomes more necessary that those occupying seats in this body should receive their commission directly from the hands of the people."

The Vote on the Pension IIIII.

WASHINGTON, Feb. 26.-Of the 175 votes cast to pass the dependent pension bill over the president's veto, 139 were cast by Republienns and 38 by Demoernts. Not a Republican vote was recorded in favor of the veto, but the line was solid ngainst it. All of the southern Democrats voted to sustain the veto except Gen. Woolford, of Kentneky, and Mr. Taulbee, of the same state. When other charges, that meat three times a day. Judge Holman, of Indiana, ammonuced his vote in favor of the bill despite the veto there were roars of laughter, and the vote of Randall, east also to pass the bill, was greeted with lond applanse.

inviting a senate committee to be present at the powers and duties of the department of agriculture that passed the senate Wednesday awaits only the agreement of the house to the senate nmendments and the signature of the president to create n new executive department and add to the cabinet mother culture and labor. The president has as yet given no influstion to any one as to whether or not he will approve the bill, but it is generally supposed that he will, although several well informed oilleials have expressed the belief that he will veto it as unconstitutional. No such question, however, seems to have been raised when the other departments were crented. Mr. Colman has not yet received any information from the president as to whether or not he will be appointed, and bill the secretary will not likely be selected antil after the adjournment of congress.

Minister Fendleton's Silence.

WASHINGTON, Feb. 26.-Minister Pendleton has returned to the city, but declines to be interviewed. The story that he is to enter the cabinet has been revived by his saying to a friend, who expressed regret that he was so soon to return to Berlin, that he was not so sure about that, and that it was not by any means settled that he would return nt all. This statement, taken in connection with his refusal to see reporters, leads to the belief in some quarters, that the president may wish him to succeed Mr. Manning.

One Commissioner Selected.

NEW YORK, Feb. 26.-The Sun says: President Cleveland has tendered to Andrew D. White, ex-president of Cornell University, and ex-minister to Berlin, one of the commissionerships under the interstnte commerce bill. He is now in this city, having come here to consult friends as to the advisability of accepting the place. The letter from the president offering him the office Is quite long. Mr. Cleveland says, among other lhings, that he is much troubled over the composition of the commission. He feels it necessary that New York should be represented in it, since this state is the center of the railroad systems and the transportation ousiness of the whole country. His wish is expressed to secure as the New York member of the commission a man of high standing, integrity and ability. The proifer is a peculiarly complimentary one to Mr. White, since he was one of the strong supporters of Mr. Blaine for president. It is understood that he was personally inclined to accept the place, but has been induced by friends to decline It, apparently on the ground, as expressed by one of them, that the commissioners can hardly expect to satisfy either the people or the railroads, and must inevitably incur the reputation of poor abilities, however nble they amy really be,

A WOMAN IN FLAMES.

Terrible and Probable Fatal Accident to

Mrs. Bruner, in Indhanapolls. Indianapolis, Feb. 26. - Mrs. J. M. Bruner, of this city, was terribly burned yesterday in an attempt to fill the tank of a gasoline stove. The thid became ignited and communicated with her clothing, and she was soon enveloped. She made a desperate effort to suppress the fire with a cloth or blanket, but flilling, she then started for the residence of Benjamin Cully, in the same yard. By that time every particle of her clothing was on fire.

Mrs. Culley heard her cries and those of her little daughter, and ran to her assistance, and, us she came up, Mrs. Bruner attempted to throw her arms about her, but finally she realized what Mrs. Culley was saying, and in obedience to her instructions threw herself on the ground while the latter wrapped the blanket about her, and in other ways tried to stamp out the fire. Neighboring ladles came to her assistance and the fire was thally subdued, but not until all of Mrs. Bruner's clothing was in shreds, and even her shoes were burned to a crisp. It was necessary to cut the clothing away, and she was then carried into the house. It is not thought that she can recover.

Threatened Strike in Plorbia.

JACESONVILLE, Fla., Feb. 26.—The threatened strike of Locomotive engineers on the Florida Railway and Navigation company's system made no progress to-day. The chief of the Locomotive Engineers' Brotherhood, P. M. Arthur, has gone to Savannah, after appointing a grievance committee to wait upon the officials of the road and demand an increase of wages equal to those now paid on other roads in Florida. The ottleials say they will not pay it, so it is believed a strike will surely follow.

NORTHERN ITALY THE SCENE OF DESOLATION AND FAMINE.

Further Accounts of the Enrthquake Report the Number Killed Over Two Thousand-Over One Hundred Villinges Believed to Have Been Destroyed.

Rome, Feb. 26.—Bussana, a village of 800 Inhabitants, situated lu Northern Italy, was totally destroyed by the earthquake. Nearly half of the villagers met death beneath tho rulns of their houses. There were over 100 Httle villages in the province of Perto Mauriozo, built on the hilisides, and it is feared every one has been destroyed, . (th enormous loss of life. At the present writing the known loss of life in Italy alone exceeds two thousand. This number will be largely added to when the telegraph lines have been repaired and communication established with remote points.

The earthquake was strongly felt at sea. Off Genoa it woke sailors from sleep. Oscillations of the earth were felt at Geneva and other parts of Switzerland, the movement being from north to south. Selsinic instruments are quiet, and no further disturbances of the cartli are fcared.

The disaster at Mentore, Monte Carlo, Nice, and at other points along the Riveria have not been overdrawn. Monte Carlo is the least injured of the cities along the coast and has become a refuge for thousands of homeless. A bread famine is imminent in conse-

The number of killed at Nice and in the immediate vicinity is twenty. The list of injured is large. Miss Chapel, an American, was burled alive in the ruins of the Villa Natal, but was rescued unhart. In Memory of the Duke of Aihany. CANNES, Feb. 26.—The fountain of St. George, erected at the foot of the villa Novada by the French residents of this town in memory of the Duke of Albany, was unveiled yesterday. The Prince of Wales was present. The Duc do Chartres, on behalf of the Comte de Paris, delivered an oration in which he said that the French colony was happy to offer the memorial as a pledge of sympathy to the Ilritish nation. The orator's sentlments were echoed by the mayor of the town in a short address. The Prince of Wales returned thanks. Among those present were many English and French residents and vis-

Bentin, Feb. 26.—The idea is gaining ground that the enhanced strength of the National Liberals will lead to a rupture of the National Liberal and Conservative coalltion after the passage by the reichstag of the ceptennate bill.

The Post advises the government not to overstrain its bow, but to confine itself as before, to absolutely necessary measures, especially those relating to fluancial affairs.

ROBERTSON LOCKED OUT.

He Makes Another Attempt to Enter the Indiana Senate.

Indianapolis, Ind., Fcb. 26.—Col. Robertson again demanded adulttance to tho senate chamber, and was denied by the door keepers. All doors except one were barricaded, and men were excluded from the galleries. Robertson says he will institute no litigation to oust Smith, but will content himself by making a formal demand dally for admission. Republicans in the semite took no part in yesterday's proceedings. A majority molphed resolutions asserting that no court yet held in Indianapolis had been for the purpose of roaching any decision in the election of a lieutenant governor. That inasmuch as Judge Niblack had said the senate was qualified to elect its presiding officer, and as it had elected Smith he alone was president. However, they were willing to submit the question of the llentenant governorship to the supreme court as arbitrators, and abide by its decision. When your, correspondent mentioned this resolution to Judge Niblack ho laughed heartily, and said it struck him as a huge joke to call upon the court to act as arbitrators after refusing to accopt their decision as judges.

The Republicans talk conservatively and peacefully, and think that Robertson in the role of a martyr will secure the governorship next year. The Democrats are alert, and say that the peace talk of the Republlcans is deceitful. Yesterday the Republican state officers bounced the old Democratic board of police commissioners and appointed another, composed of Republicans, with one Democrat. The latter, the Democrats say, is unrellable, and they fear that orders will be given to the metropolitan police to protect Robertson in another attempt to take possession of the presiding officer's chalr. A petition for a rehearing in the case of the lieutenant governorship will be filed in the supreme court by Judgo Turple and Jason Brown, representing the appellee, Alonzo G. Smith, presiding officer of the senate.
